

is now a part of...

Worthington Industries acquired the assets of the global CryoScience business of Taylor-Wharton, including the manufacturing facility in Theodore, Alabama, in December, 2015. The portfolio of autofill freezers, cryogenic refrigerators, portable liquid dewars, dry-shippers and transport vessels are now available from Worthington Industries, a leading global manufacturer with more than 40 years of experience manufacturing pressure cylinders and related products. Since its founding in 1955, Worthington has built a reputation on safety, quality, and regulatory compliance, ensuring the protection of our employees, customers and industry.

We are excited about the growth opportunities in end use applications and tailored solutions across the expanding life science market, including the trusted CryoScience by Taylor-Wharton portfolio. We intend to update and expand our product offering for existing product lines, as well as continue to explore adjacent cold chain opportunities.

"We plan to expand on the 57-year legacy of the Taylor Wharton name by bringing new, innovative products to our customers - powered by the CryoScience team you know, backed by the resources of Worthington Industries."

~ Sean Murray, GM Cryogenics
